“Electro-Wizard” Automatic Battery Disconnect Switch – ON Your Fleet, OFF Your Mind!

Flaming River is proud to introduce its all new Automatic Battery Disconnect Switch. This heavy-duty 12V battery switch ties into your vehicle’s ignition to control and operate the vehicle’s battery system. When the ignition is turned to the OFF position, the battery is automatically disengaged and becomes non-operational.

Our system uses Passive Magnetic Solenoid Operation, so as long as your vehicle is turned off, the battery system is automatically turned off as well. Kits available with or without 3 minute time delay. For more information visit www.flamingriver.com or call 1-800-648-8022.

- 12 Volt Electronic Battery Disconnect Switch. 24V system available upon request.
- Passive Magnetic Solenoid Operation – No mechanical switch to forget to operate
- 250 Amps Continuous / 2500 Amp Surge
- IP 65 Rating
- Sealed Waterproof Design - Can withstand the most severe operating conditions
- Ideal Protection For:
 - Construction, & Farm Equipment / Mining & Off-Highway Vehicles
 - Heavy-Duty Trucks
 - Automotive / Racing
 - Marine
